Description:

- Institutes require efficient systems to manage campus recruitment activities involving companies and students. Currently, many institutes rely on spreadsheets, emails, or manual coordination, which makes it difficult to manage company approvals, placement drives, student registrations, and application tracking
- Used Ai/llm not more than 10% just used it for syntax help and to debug not for the logic.

Technologies used :

- Flask for API
- VueJS for UI
- Jinja2 templates for sending monthly reports
- Bootstrap for HTML generation and styling
- SQLite for database Redis for caching
- Redis and Celery for batch jobs
